

## **CLEE Capstone Mentors**

### **Class XXIII**

The capstone presentation is the final and crowning achievement for the students prior to their graduation. A CLEE-graduate mentor is assigned to each student to assist them in the development of their proposed capstone topic. The mentor works with them all year to assist the student through the on-going process of refinement right up to the final presentation. The CLEE mentors serve on the evaluation panels for the students' capstone presentations as well.

The CLEE mentors make themselves available for consultation as needed. In addition, they meet with their assigned students during each in-residence session to review the student's on-going progress, make suggestions, and sign off on the student's work.

The CLEE mentors receive professional service credit that they can apply to their requisite recertification points.
